‡ Programa Brasil Transparente. A initiative undertaken by the CGU from 2012. It is only considered if the state government, TCE or the Secretaria de Transparéncia signed the term.

‡‡ The evaluation was conducted in march, 2017. According to the methodology, the jurisdiction will be considered as having an oversight agency when the regulation specify an agency as responsible for the task of "monitoramento" or "fiscalização" of the whole jurisdiction government or at least of the Executive branch. The regulations of the States of Amapá, Pará and Sergipe couldn't be found.

DNA - Data Not Available

Data extracted from (MICHENER, 2016, p.40-41)

This evaluation is based on the data collected in June, 2016 within the scope of the Transparéncia Local no Brasil report. The e-SIC definition presented here matches with the methodology (p.30) engaged in the former study. Accordingly, when a jurisdiction achieved 100 points in the "1. Comunicação na Plataforma" variable and 100 points in the "2.Login e Recibos" variable it was considered as having an e-SIC structure. The data collection was double coded and when there was a conflict between the coders evaluation, the higher punctuation was considered for the calculation.
